FACIT 4510

Where options are standard

Facit 4510 is a small multipurpose matrix printer designed for the new generation of computers where a small professional printer is needed. Facit 4510 is designed to work in any application:

- with various paper types (fanfold, roll or singles)
- with multiple fonts for text applications
- with national character sets
- with block graphics as well as pin graphics

to give you flexibility and efficiency.

The operator can select a versatile range of printout modes by means of a rotary switch on the control panel. The modes include font selection (10, 12 or 17 c.p.i. in standard resolution 9 x 9 matrix, and 10 c.p.i. (monospaced) or proportional in a high resolution 9 x 15 matrix.

It is also possible to select block graphics or pin graphics, plus a transparency mode (the printer is code transparent to all control codes except CR and LF). All those possibilities - plus a number of others (more than 40 functions) can of course also be selected from the data source.

DATA PRODUCTS

With a variety of print modes

Facit 4510 is a small matrix printer for demanding applications. Here are 15 combinations of print modes and character spacings offered to distinguish between different areas of interest.

NORMAL (10 CPI)

CONDENSED (12 CPI)

COMPRESSED (17 CPI)

NORMAL + UNDERLINED

CONDENSED + UNDERLINED

COMPRESSED + UNDERLINED

NORM. + ELONG.

COND. + ELONG.

COMPR. + ELONG.

HIGH RESOLUTION, MONOSPACED

HIGH RESOLUTION, PROPORTIONAL

UNDERLINED

UNDERLINED

UNDERL. + ELONG.

UNDERL. + ELONG.

Facit 4510 is designed for efficient work with formats - all the format parameters correspond to physical positions on the paper, regardless of any changes in line spacing, character spacing or print mode.

DATA PRODUCTS

Personal — and yet professional

Facit 4510 is hard to describe in a few words. It is a small printer only in size. A short form summary will always lack some important features. Are you looking for a small but powerful printer you really must take the time to read this!

FOR TEXT APPLICATIONS:

- * IN TOTAL 5 DIFFERENT FONTS
 - 9x9 10dpi — monospaced
 - 9x9 12dpi — monospaced
 - 9x9 17dpi — monospaced
 - 9x15 10dpi — monospaced, high resolution
 - 9x15 — — proportional, high resolution

- * AND ALL IN 8 NATIONAL VERSIONS

FOR EXTRA PERFECTION:

- * SELECTABLE SPACING INCREMENT
 - Any value from 1/200 of an inch
- * ABSOLUTE CHARACTER POSITIONING
 - With reference to the current font
- * ABSOLUTE DOT POSITIONING
 - With reference to the current dot resolution
- * REPEAT DATA

FOR CONVENIENCE:

- * SELECTABLE SKIP OVER PERFORATION ZONE
 - 0, 0.5, 1, 1.5 inch
- * SELECTABLE DEFAULT FORMAT LENGTH
 - 8, 8.5, 11, 12 inches
- * SELECTABLE DEFAULT FONT
- * SOFT RESET TO POWER-UP CONDITION

FOR GRAPHIC APPLICATIONS:

- * BLOCK GRAPHICS
 - 64 Viewdata compatible block characters
 - 3 different resolutions
- * PIN GRAPHICS (full control over each dot)
 - 1:1 aspect ratio
 - 3 different dot resolutions (60, 72, 100 dots/inch)
